SEA DNA 999

Live the thrill.

Thrilling rides that
are worth experiencing

The Sea DNA 999 is TECHNOHULL's timeless and iconic model. Counting 16 years of thrilling rides, the 999 is a genuine sport boat, designed for the passionate drivers out there. Having been redesigned with the Dynastream hull design technology, she makes a highly competent boat in any weather condition, while combining top speeds with outstanding running comfort. Adding to these, her utterly captivating silhouette and one-of-a-kind character, it comes as no surprise that the Sea DNA 999 is a living thrill.

SEA DNA 999

Live the thrill.

DESIGN

Sharp and dynamic, sleek and lean, the Sea DNA 999 follows an unmistakable design concept.

Confirming the rule that form should follow function, she boasts an athletic, racing silhouette that very few boats of her class can compete with.

- ≈ Sharp and dynamic design
- ≈ Ergonomic sporty console
 - ≈ Full walk around deck
- ≈ Sporty color combinations
- ≈ Functional social areas

PERFORMANCE

Nothing compares to Sea DNA 999

The Sea DNA 999 not only focuses on the driving experience itself but also takes things to the next level. Totally redesigned, with TECHNOHULL®'s Dynastream patented hull technology, she boasts a technologically advanced hull that not only improves significantly the original British design but also endows the boat with never seen before seakeeping qualities, making her a high performer all the way and moreover a joy to drive.

SEA DNA 999

Live the thrill.

THE HULL

Aggressive, yet smooth and extremely stable

Being and looking aggressive in its design, while offering a smooth ride and extreme stability, even in high speeds sum up the superiority of the Sea DNA 999's hull. In contradiction to the common belief that a boat with a narrow beam while being seaworthy, cannot perform in high speeds and maintain its handling capabilities, its Dynastream hull design succeeds to redefine the rule book.

≈ Super aggressive

≈ Sharp waterline entry angles

≈ Hyper ventilating twin step configuration

Live the thrill.

PERFORMANCE

DYNASTREAM HULL TECHNOLOGY

Every TECHNOHULL is designed from scratch, based on a custom designed hull to best fit its own specific characteristics and operational profile, a competence shared among very few boat manufacturers in the market. The result is the optimum balance for each model between high performance and user friendliness. Dynastream hull design technology, which has been developed after extensive research by TECHNOHULL's high expertise team of naval architects, is based on state-of-the-art computer programs and hull structure algorithms, that after evaluating the working envelope of each model, confirm the key hull design aspects. The process continues by matching these key hull design aspects with even more detailed model requirements. Using both analytical formulas and testing from full size and scaled-down models, various hull versions derive. A vast database is constantly populated with results to optimize the design and after several design loops, the hydrodynamic profile is streamlined and strake geometry, step number, step positioning, and the variable dead-rise distribution along the hull's surface are set.

SEA DNA 999

Live the thrill.

In every TECHNOHULL, the latest technology is employed, and advanced techniques and materials are applied ensuring the highest construction quality and enhancing overall performance.

Top quality gelcoats, multiaxial fibers, vacuum infusion technology and the production of carbon infused pats with post curing processes result in top quality light weight strong and durable hulls.

COMFORT

Focusing on the driving experience itself,
while pleasing the guest as well.

- ≈ Shock absorbing seats and a state-of-the-art digital management system ensure you get the best out of a dynamic ride.
- ≈ Deck configuration options and deck amenities that offer an equally pleasurable and rewarding experience for the guests on board.
- ≈ Head room with shower under the console enhances comfort.

THE HELM STATION

COMFORT

- ≈ Elegant hardtop design
- ≈ Twin helm station arrangement with shock absorbing bucket seats
- ≈ Top Quality multi display screens
- ≈ Premium quality steering wheel
- ≈ Ergonomic twin level footrest

BOAT ENGINEERING

Sophisticated, state of the art engineering

- ≈ EMPIRBUS digital power distribution center
- ≈ Manual bypass switches for critical systems
- ≈ Split DC electrical system designed to protect the start battery pack and provide multiple power feeds for critical systems such as navigation
- ≈ Standalone engine starting and power steering circuits
- ≈ Automatic main battery power switches with automatic paralleling function
- ≈ House battery system designed to maximize powering of house loads
- ≈ Bilge pumps drain sumps, refrigerators, lighting and all automation features controlled directly through the central digital distribution center, all fed directly from the house battery bank with reset only circuit breakers so that these critical circuits can't be accidentally turned off
- ≈ Self-bailing deck through large scuppers

General Characteristics

Length Overall	10,3m
Beam	2,80m
Hull	DEEP V:Ventilated Steps
Light Ship Weight	Approx. 2,600kg
Fuel Capacity	570lt
Water Capacity	100lt
Berths	2
Max Engines	2x450hp
Engine Options	Outboard/Inboard
Number Of Passengers	8
Design Category	B-Offshore

SEA DNA 999
